

DNC (Disabled Newlife Center) – Kathmandu, Nepal

This center, based in Kathmandu, Nepal is home to 28 children who have varying disabilities. We have established a medical fund to cover the cost of orthopedic surgeries for the children and physical therapy. Twenty-five orthopedic surgeries have been accomplished with donated funds. Think about the impact that your donated funds will have! We've also started a higher education fund so that these wonderful children can advance their knowledge in college or through vocational training. Two girls from DNC are currently attending college on funds donated through TRIFC! We continue to collect funds to support the medical fund and higher education fund so that children graduating in the coming years will have the opportunity at an education in a society that views people with disability as worthless; cursed or suffering from a past-life sin.
